MASCHINE : INSTALL STEPS

The sample pack comes with the following file types, which can be used with Maschine:

Maschine Sounds or Groups

Samples (.wav files)

INSTALLATION

**First, to add the sample pack to your Maschine library's database:**

1. Go to Maschine's preferences, click the User Paths tab.
2. Add a new path that points to the top-level folder for the sample pack.
3. Click on Rescan.
4. Click on the disk icon in your Machine browser.
5. Browse to the main sample pack folder location and open the main folder.

Next, you have two options:

A) Quickly add the content to Maschine without subcategorizing it.

This method imports everything at once and puts it in a product specific bank inside Maschine, so you can browse for the files using Maschine's browser. However, you won't be able to filter the content based on type or subtype.

6. Shift select all the sub-folders beneath the main sample pack folder.
7. Click Import.
8. Create a new user Bank and name for the pack.
9. Click OK.

B) Add and categorize all the content, so that later you can use Maschine's browser to find content by type and subtype.

This method takes some time (5-10 minutes), but will allow you to add everything to the browser and categorize in as much detail as you wish.

6. Open specific folders and select the content you wish to assign a type and subtype to.
7. Click import.
8. Create or chose a type or subtype
9. Click OK.
